HEAT TRACING AND DISTRIBUTION
PANELS

TURNKEY DESIGN, FABRICATE & Commission

THS Heat Trace Distribution Boards – Designed specifically for Raychem Heat Trace Installations.

Panels can be fabricated for use in Safe or EX D environments – Each panel is Custom Built to individual customer specifications and

THS heat trace Distribution Panels :

Custom Built – Internal Quality

THS offers CUSTOM BUILT power distribution panels for use with industrial heating cable systems. All panels are available in single- and three-phase models and we offer a range of voltage options, a choice of main circuit breakers from 100 to 1000 Amps,

Panels are designed to specific Customer requirements and are adaptable for use in Project environments where it is often critical to have additional spare capacities.

The Custom Build philosophy ensures that maximum savings are made on space, size, weight and type / sophistication of control – we recognize that in applications such as those offshore space and weight are critical factors.

Panels can be supplied in IP 41, 52, and any environment type up to EXd.

HL/HV JOC EXD Heat Trace Panels - Vietnam

THS Southern Africa have supplied Heat Trace Panels for a variety of Customers in the Region and in Asia, ensuring Quality of Design and Optimum Performance of Heat Tracing Systems.

114 Circuit Control and Distribution Board for Lamson

THS Africa are in the Unique position of being a Heat Trace Integrator – representing various manufacturer’s for heat tracing systems – while having in house design, commission capabilities.

Designed specifically for use with our Raychem / Pentair Heat Tracing Designs

From Design stage to Installation THS will meet your deadlines and exceed Quality expectations.

Thermal Management – Guaranteed.

THS Heat Trace Distribution Board – Pre tested – pre Commissioned, ready for Shipment and Service.

THS utilize world class components in our Panels – “Moeller”, Eaton, Mitsubishi or to client preferred manufacture.

THS supplied Heat Trace Distribution Board No 1 of 2 – Lamson TLDD Project
